

Kitchen Planner

Use the grid and cut-outs to plan your kitchen using our Freestanding Furniture

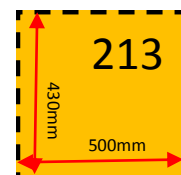

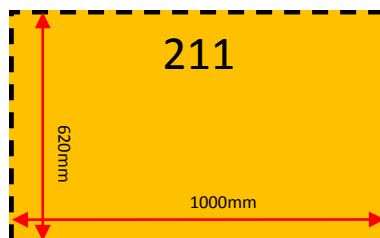

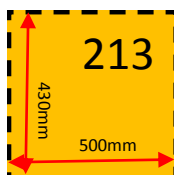

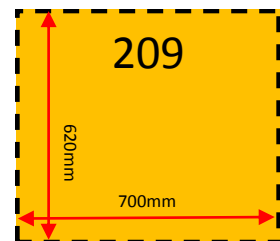

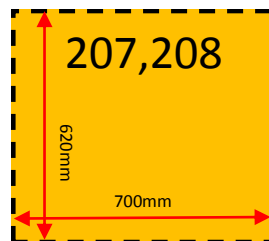

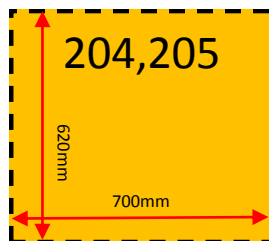

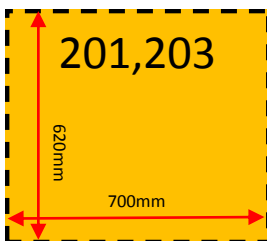

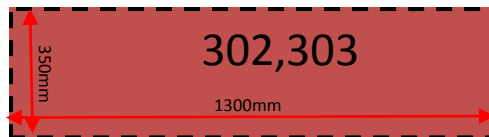

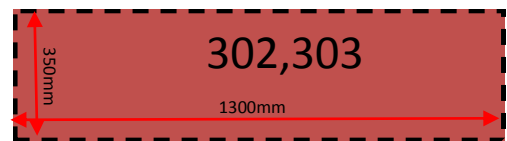

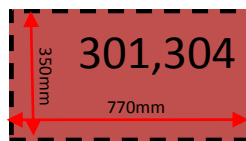

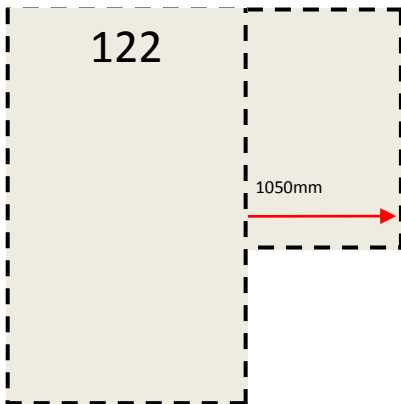

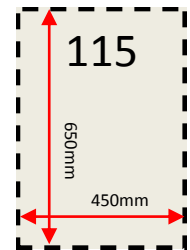

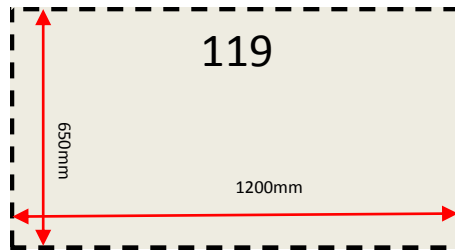

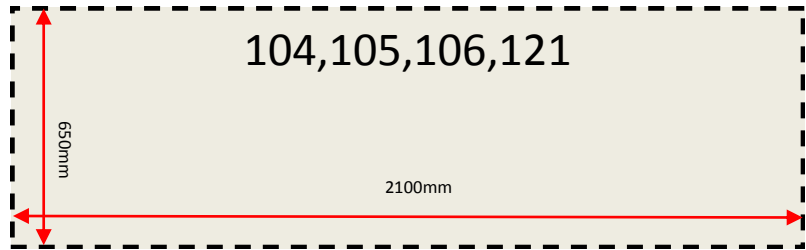

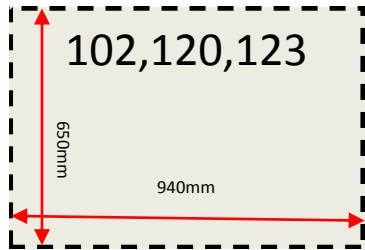

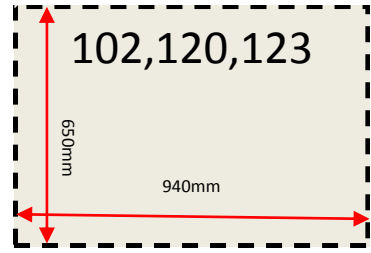

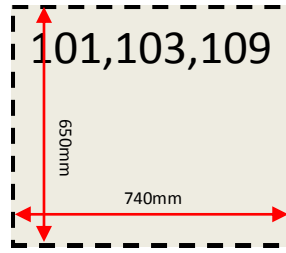

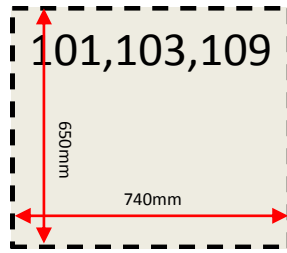

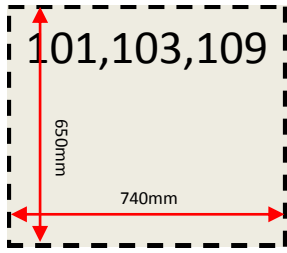

- Each large square = 1m (100cm)
- The cabinet code numbers are written in their appropriate cut-outs
- If you need more of one size print more copies
- If you want to make an order or get a quote, fill in the contact box at the bottom of the grid and send back to:

info@the freestanding kitchen.com

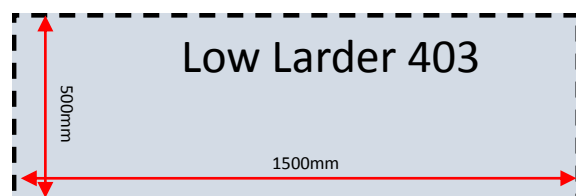

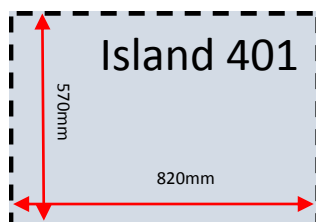

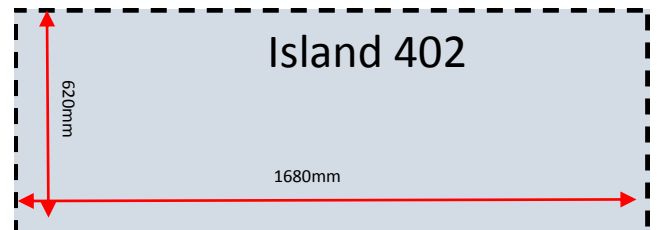

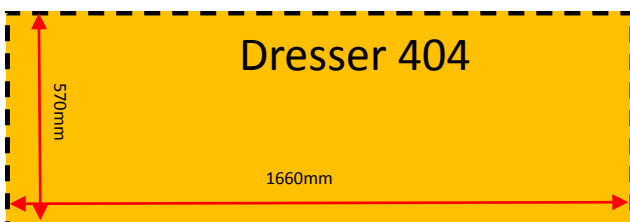

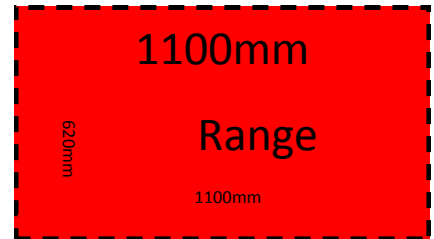

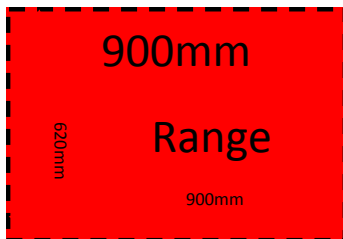

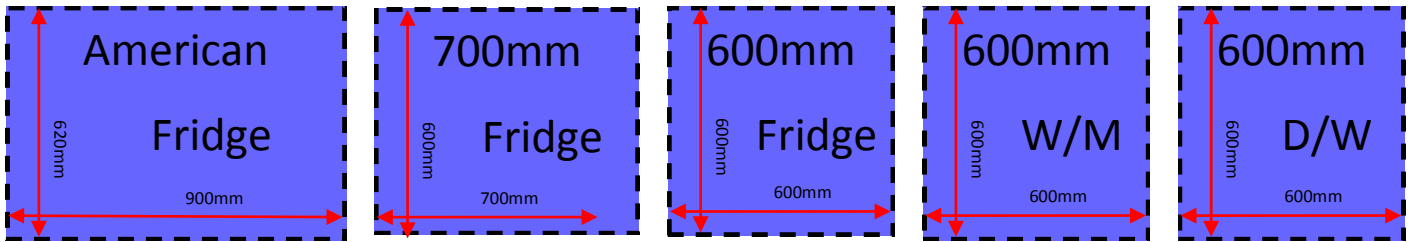

Fax 01787 224497

Hints and Tips

1. Put all doors and windows onto the plan
2. Try and draw the whole room as this helps to get the kitchen into perspective.
3. In freestanding kitchen design you may end up with some gaps. Remember we can alter the cabinets to make them fit perfectly. Give us a call if your unsure if a cabinet can be altered and our helpful team will give you some guidance.
4. You need less room to open a drawer than a door.
5. Appliances can be fitted in to either side of 104 and 105 (the drawers are false on this item). If you want only one appliance, the other side can be fitted with shelves at a price of £90.
6. A single appliance housing is item 109.
7. The cabinets that take appliances are wide enough to take a freestanding appliance or the door can be attached to create an integrated look.

Other useful cut-outs that might be in your kitchen.
